SUMMER ONLY

Sign up now for Summer Environmental Ed. Internships

at the Life Lab Garden Classroom on the UCSC Farm!

Describe the internship assignment:
Come enjoy summer on the Farm, and get school credit!
Interns assist with our garden-based summer camps. Work with our counselors to make camp happen! Assist with teaching camp activities, leading hikes, and behind-the-scenes tasks such as setting up stations and stocking materials. Gain valuable experience in environmental education!

--Garden Sprouts Camp (for 4-6 year olds) This camp runs June 24-August
--Wildlands & Watering Cans Camp (for 7-10 year olds) This camp runs June 24-August 2.
--Farm & Wilderness Camp (for 11-14 year olds) Harvest, cook and enjoy produce from the farm and garden; practice wildlife tracking and wilderness survival skills; explore local open space reserves. This camp runs August 5-9.

Interns receive training in:
Garden-based environmental education, working with children in an outdoor setting, positive discipline, environmental education, games, songs, activities, and much more!

Prerequisites:

How to sign up:
Our internships are first-come, first-served, by the date I sign your paperwork (see details below). Once we have agreed on a plan for your internship, there are a few steps to signing up:
1. Sign up for credit-- Most interns get credit through the Env Studies internship office (internship coordinator: Chris Krohn). Stop by the Env Studies Internship Office to get the paperwork and find out what you need to do to register for the internship as a class. Get the paperwork for the two-unit internship.
2. Sign up with me-- Make an appointment with me (Amy) at Life Lab and I’ll sign your paperwork and ask for a little more info, including which day(s) of the week you are interested in interning. I am the only one who can sign you up, so please make an appointment first to make sure I’ll be here, and ask for directions if you need them!
3. Training--Required training is June 17th (hours TBA) at the Life Lab Garden Classroom. Visit http://www.lifelab.org/classroom/visiting/ for directions to the Life Lab Garden Classroom.
