Describe the internship assignment

Quarterly internships available to Work with the Monterey Bay Salmon and Trout Project (a non-profit organization). Students will play a key role in management of a conservation/restoration hatchery restoring coastal salmonid species listed as threatened under the Endangered Species Act. Most will be at the hatchery in Scott Creek Watershed (northern SC County). Seasonally, some parts of the work will be in other locations.

Prerequisites: Outline the skills and background information necessary to participate in this internship.

Intern must be:
- interested and willing to perform fieldwork, and some manual labor regardless of weather conditions (we work rain or shine)
- willing to assist for some less-than-exciting tasks. Some weekend work is required during winter and spring quarter. In general we try to have a good time and make the work fun for everyone.
