Watershed Program Internship
The Santa Cruz Museum of Natural History is seeking Watershed Program interns to help lead school tours through the Neary Lagoon wetlands. This outdoor, experiential program gets kids interested in our local watershed, while educating them on the delicate balance of our water systems. Interns will work outdoors with education staff leading small groups of 5th graders in field trip activities such as water quality testing. Other duties may include delivering classroom presentations and helping to maintain and develop curriculum and supplies. Interns should be available at least one weekday morning per week from 8:30am-12:30pm.

Requirements: Interest and experience in at least two or more of the following areas: environmental education, public speaking, watershed science, working with children, or/and outdoor education.

To apply: Please fill out an online application at santacruzmuseum.org
Send any questions to volunteer@santacruzmuseum.org or 831-420-6115, #13

Wetland Program Internship
The Santa Cruz Museum of Natural History is seeking Wetland Program interns to help lead school tours through the Neary Lagoon wetlands. This outdoor, experiential program educates students about wetlands and the birds who inhabit Neary Lagoon. Interns will work outdoors with education staff leading small groups of 3rd graders in field trip activities. Other duties may include delivering classroom presentations and helping to maintain and develop curriculum and supplies. Interns should be available at least one weekday morning per week from 8:30am-12:30pm.

Requirements: Interest and experience in at least two or more of the following areas: environmental education, public speaking, watershed science, birds, working with children, or/and outdoor education.

To apply: Please fill out an online application at santacruzmuseum.org
