Integrated Pest Management Intern

Background: Founded in 1980, Jacobs Farm produces over 25 varieties of culinary herbs such as basil, rosemary, thyme, and sage; all grown organically, in greenhouse and field production located throughout San Mateo and Santa Cruz counties.

Responsibilities include:

- assisting Integrated Pest Manager with greenhouse and field pest monitoring and trials
- sample and data collection
- data entry
- literature review
- scouting for insect pests and diseases
- assist with acquiring materials for scouting and trials

Skills and Qualifications:

- familiarity with Excel preferred
- Horticulture/Biology/Agriculture major preferred
- Self-starter
- detail-oriented
- previous experience assisting with sampling and data collection field trials desired, but not required.
- willingness to assist with various and all tasks related to multiple, on-going field and greenhouse trials.

The Integrated Pest Manager Intern is a paid internship position that requires a commitment of 15-20 hours a week, starting in June 2013. Scheduling of intern hours are flexible, but applicants are expected to be available mornings and/or afternoons. Please send a resume and a statement of interest 1-2 paragraphs long, describing why you are interested in the internship, goals and expected outcomes, and projects, if any you hope to participate in this summer.

Please send resume and statement of interest to: Katrina.Hunter@delcabo.com.
