CASFS is offering 5 & 2-unit internships
APPLY NOW!

CASFS is offering 5 & 2 unit, lower division farm and garden internships focused on field-scale and market garden-scale harvesting, tillage, planting, composting, cover cropping, and propagation.

- 5 unit and 2 unit applicants accepted
- There are ~35 positions available across three different work sites
- Fieldwork schedule: M/W/F 8:30-12 noon
- 5 units work all three days/times, 2 units work any two of the three days/times available
- At least 80% of internship will consist of outdoor fieldwork
- Internship includes some readings and discussions, to provide context and preparation for fieldwork
- Internship applicants need to be prepared and enthused to work outdoors in occasionally uncomfortable weather conditions. Given field conditions, students may want to change their attire, prior and/or post fieldwork. Please take this time into account when considering this internship and your course schedule.
- The farm is located at the base of campus, a 10-minute walk from the nearest bus station (Village/Lower Quarry). The Chadwick Garden is located below Merrill College.

If you are interested in this internship opportunity, please contact Damian Parr dmparr@ucsc.edu. Internships will remain available until positions are filled, and the quarter's enrollment period allows. Spaces fill quickly.
