Central Coast Wilds nursery is a wholesale native plant nursery that specializes in growing watershed specific native plants for habitat restoration and ecological landscape projects. We grow hundreds of species of native plants that are indigenous to watersheds throughout the Monterey and San Francisco bay areas. The nursery began as a back yard nursery on the Westside of Santa Cruz in 1992 and rapidly grew and moved to the Soquel Hills in 1993. In 2000 the nursery moved back to the City of Santa Cruz to the current location on Golf Club Drive.

**Temporary Propagators / Interns/ Volunteers**

We are looking for bright and hardworking individuals who are interested in propagation and California native plants. We have a very large State Parks project and need assistance with propagating nearly 90,000 plants! The work is temporary, from October 1\(^{st}\) to December but there is potential for more work possibly after December.

We are offering $10/hour, an internship for units at UCSC or volunteer experience. Flexible hours between 9am-4pm Monday through Friday.

Minimum qualifications:
- Willingness to work outdoors, in warm and cold conditions
- Ability to comfortably lift 30+ lbs and stand for long periods of time
- Strong communication and ability to learn quickly
- Good work ethic and time management
- Comfortable working with chemicals such as bleach and alcohol
- Work well with others and various management of all ages, genders, etc.

Please contact Cindy Hudson and Ayla Mills via email if you’re interested!
