

Interested in Seed Sovereignty?

Intern at the Demeter Seed Library!

The Demeter Seed Library is a student-run organization within Food Systems Working Group that preserves and promotes the cultural and genetic heritage of our food while resisting corporate consolidation of seeds.

We're looking for driven 2-unit interns for the Spring quarter! Interns will help with organizing inventory, conducting germination tests, coordinating events, and distributing seeds to the community. Internship could lead to a paid position.
