- Address: 1425 Hidden Valley Rd, Soquel CA
- Website: oceans360.org
- Interns/Hours: 1 intern/6 hrs per week
- Quarters: All

Assignment Description

We are an ocean conservation education 501(c)(3) nonprofit, that uses virtual reality to communicate the need for reduction of ocean plastics, encourage sustainable use of ocean resources and work on global warming and its effect on coral.

We need an intern who can help with three things:

1. Keep a regular presence on Instagram for Oceans 360.
2. Occasionally help out at venues where we are showing people our videos in the Oculus Go virtual reality headsets. We are building a library of 3D underwater video shot by scientists and filmmakers around the globe. Our custom camera is being used by Nat Geo for various VR projects. See photo below.
3. Occasionally participate in assisting our staff in making classroom presentations using the technology with set-up help and assistance that might be required while the students are using the VR headsets.

Prerequisites

- Good knowledge of Instagram.
- Familiarity with ocean biology/conservation issues.
- Outgoing personality for dealing with students and the public.
- (We will teach them how to use the Oculus Go VR headsets.)
