Internship Description:
Internship with the City of Watsonville School Program at the Wastewater Recycling Plant and Wetlands of Watsonville

Interns will provide hands-on education for small groups of Watsonville middle and elementary school classes at the Wastewater Recycling Plant and at the Wetlands of Watsonville trails. City of Watsonville Conservation Field Trips empower underserved, bilingual youth to interact with their local water utilities and wetlands. Through this internship, college students develop knowledge of wastewater recycling technology and habitat restoration of the Watsonville wetlands. Inspire students to conserve and protect our water and prevent pollution. Realize the role of a City Public Works and Utilities Department in water conservation and watershed protection. Training and ongoing support will be provided. Position hours are 8:30 – 1:00 Fridays, some Thursdays and additional hours as arranged at the Wastewater Recycling Plant, 500 Clearwater Lane and Watsonville Nature Center at 30 Harkins Slough Road in Watsonville.

Prerequisites: skills and background information necessary to participate in this internship.

- An interest in the fields of environmental justice, environmental interpretation, & natural resource management
- A desire for work experience with a local government agency
- Comfortable communicating with small groups of students
