

UCSC ENVS

Forest Restoration Research Internship

Do you want entomological lab work experience? Sign up to research ant communities in tropical forest restoration! We're discovering how ant assemblages change during restoration. Students will get hands-on experience with insects in the lab, learning how to prepare specimens and collect morphometric data. No experience is required.

Student Research Sponsor: Christina Blebea, ENVS Grad
Email: cblebea@ucsc.edu
Number of Interns/Hrs: 2 and 5 Unit Available
Interns and Volunteers Welcome
Quarters Needed: Fall, Winter
