PERMACULTURE

PERMACULTURE FARM INTERNSHIP

Santa Cruz Permaculture supports a thriving, just, and sustainable world through courses, consulting, and farming.

ABOUT THE FARM

A 26 acre organic and regenerative farm 20 minutes north of Santa Cruz on the coast. We're headed into our first CSA season and will be implementing 5-10 acres of vegetables and flowers, an extensive permaculture food forest, animal integration, watershed management, natural building, and more.

ABOUT THE WORK

Our crew will work together Fridays from 9:30 to 12:30, break for lunch (and beach time!) from 12:30-1:30, and then work again 1:30-4:30pm. We anticipate this being a very fun, community-building, and holistic experience. Work ranges from composting, planting, harvesting, pest and disease management, irrigation, food processing, herbalism and other farm+garden experience to forest management, watershed regeneration, natural building, fencing, and animal husbandry.
