**Environmental Studies/Biology Combined Major**

Note: all courses must be taken for a letter grade

This major provides students with the basic tools of biological science and sufficient understanding of resource conservation, conservation biology, and concerns about environmental sustainability. It prepares students for graduate school or a career in the areas of conservation biology, restoration ecology, and other allied interdisciplinary life science fields. Students wishing to enter into specific graduate programs or seeking specific career certifications such as wildlife biologist need to check the requirements of each program and may need to add elements to their curriculum.

### Introductory Requirements (12)

**After filling out the academic plan above and the elective courses on the other side, meet with an ENVS faculty member to discuss.**

**Advising Checklist:**

- Have discussed student's interests and career goals
- Prerequisites taken or planned before ENVS 100
- Electives reflect a focus and your intellectual and career goals
- Opportunities for internships and independent research have been discussed
- Discussed senior exit options
